Subject: Miller cost estimate
ECMS Miller Chemical Fire Response.pdf

Greg,

Attached is a cost estimate for the hours (by personnel and labor category) and costs expended so far this week, and projected hours for the rest of the week. Please note that I was a little under what I verbally quoted you for the lab costs earlier... I forgot about a few of the QA samples. The lab costs will actually be around \$4,700, not \$4,000, for all samples on 24hr prelim/7-day full data package. However, the increase in price from 48hr to 24hr TAT for the preliminary data would be about the same as we discussed (around \$500).

Let me know if you have any questions regarding this estimate. Again, please remember these are not actual costs and are only representative of the effort for this first round of sampling.

Obviously, if we mobilize to collect additional samples, we will be looking at additional costs.

Thanks,
